

QUEER REFLECTION REFLECTION

Feel What They Feel. Rewire the World.

WHAT WE ARE

Queer Reflection is not just a storytelling platform. It's an **empathy engine**—a tech-powered, emotionally guided system that allows users to experience LGBTQ+ lives through immersive, emotionally intelligent simulations.

We use AI, AR, and interactive design to help people feel stories they might never otherwise understand—turning empathy into experience, and awareness into impact.

WHY WE EXIST

The world doesn't change through facts alone. It changes when people feel something real. Queer Reflection was created to close the emotional gap between queer communities and those who don't understand our lives—yet.

We're here to make empathy unforgettable.

HOW IT WORKS

AI-Personalized Narrative

Dynamic, responsive experiences shaped by user choices, tone, and attention.

Emotional Branching Logic

Choices with weight. Dilemmas with emotional consequence. No gamification—just resonance.

Augmented Reality (AR)

Experiences extend into the real world using Apple ARKit and WebXR.

Voice + Audio Simulation

Emotion-aware narration for nuance, intimacy, and presence.

Reflection Layer

Post-encounter journaling + emotional insight maps help users process what they've felt.

OUR TECHNOLOGY STACK

- React.js, Three.js, Unity, WordPress
- Apple ARKit, WebXR, Firebase, Google Cloud Platform
- OpenAI (GPT), Voice AI (experimental), gesture UX (in research)
- Cloudflare, Sentry, ZOHO CRM, privacy-tuned Google Analytics
- Compliant with WCAG 2.1 AA accessibility standards

WHO IT'S FOR

- Educators & DEI Teams
- Neuroscientists & Empathy Researchers
- Creatives & Developers
- Mental Health Professionals
- Anyone who believes empathy can be built

COLLABORATE WITH US

Whether you're a neuroscientist, a coder, a counselor, a teacher, or just someone who gives a damn—we want to hear from you.
